VM-10 technical note: modes and tube compatibility

Fictional document for Northfield Lab Supply, a fictional company created for a portfolio project. Not for real use.

Item	Value
Document ID	NLS-DOC-VM10-TECH-R1
Product	Vortex Mixer VM-10
Applies to	NLS-VM10-BAS, NLS-VM10-VAR
Revision	R1
Effective date	2026-03-01
Status	current

Purpose

This note explains the operating modes of the VM-10 and which tubes can be mixed. It applies to both versions unless stated.

Operating modes

- Basic: continuous operation only, using the on/off switch, at a fixed 2,800 rpm.
- Variable speed: set the speed between 200 and 3,000 rpm with the dial. Touch mode runs while the tube presses the cup head; continuous mode runs until switched off.

Tube compatibility

The cup head accommodates tubes up to 15 ml. Mixing 50 ml tubes is not recommended.

Duty cycle

Run continuously for no more than 30 minutes, then rest the unit for 10 minutes.

Good practice

- Hold the tube firmly and avoid overfilling; fill tubes to no more than two-thirds.
- Start at a low speed and increase gradually (Variable speed only).
